WHEN THE YARD IS 5,000,000SQM “I’M JUST GOING TO HAVE A LOOK” IS NOT AN OPTION

BECAUSE IT WORKS

ASSET AGENT is a proven, modular and highly scalable solution tailor-made to boost productivity in the finished cars logistics. Keep the flexibility of your production customization, from final assembly to delivery, without the frustrations of manual processes.

Boost productivity and reliability

Asset Agent will become an important part of your finishing process and boost productivity as well as increase reliability in your delivery processes.

Built for seamless integration into your IT landscape, Asset Agent can make your life easy: no user training required, plug & play with ERP systems, ease of installation and fully adaptable to your expansion plans.

Eliminate waste and save money

Manual processes are often used for the final steps of car preparation. Locating and adjusting individual cars can be a constant challenge in an extensive factory environment. Done right, it saves time, increases resource utilization and eliminates raw material wastage.

Successful and efficient post-production is all about visibility and avoiding mishaps that cost money and reduce reliability being on-time with your delivery. Correct identification of finished cars throughout the entire delivery-preparing process eliminates idle time and waste caused by incorrect handling. Delays are reduced to zero.

Asset Agent provides real-time visibility of every single vehicle in your finishing process giving valuable assistance to your workforce, without the need for high CAPEX investments like automated guided vehicles (AGVs) or a fully automated factory. will play an

important role in keeping production on track.

Optimise process, stay flexible

In production, standardizing processes leads to efficiencies. At the same time, ongoing innovation is a market demand and customers want individualized productions - flexibility is key. Thanks to the modular design of Asset Agent, optimizing processes while remaining flexible is possible.

Whether integrating automated and manual processes, applying specific sequence procedures, or analyzing past operations, Asset Agents' real-time data will play an important role in keeping car logistics on track.

Plug & Play

Asset Agent easily scales to cover every vehicle in your finishing process, providing information that can be accessed at any time, from any location. It works seamlessly with existing production management software via standard APIs and provides limitless possibilities to enhance your operations' efficiency.

he cutting edge technology and low installation effort makes Asset Agent as easy to install as it is powerful - both inside and outside of buildings and massive structures. It turns a factory mired in manual processes into one of automated excellence and eliminates human errors that reduce productivity.

KEY BENEFITS

- **Gives you control**
- **Makes your life easier**
- **Makes your work smoother**
- **Gives you valuable insight**
- **Saves you money**

With insight comes visibility

Now you can identify bottlenecks and fine-tune processes to increase efficiency and productivity. Asset Agent supplies you with real-time data providing visibility of all vehicles, where they are, and when they are checked, washed, or simply filled up with fuel.

Comprehensive reports provided by Asset Agent's software enables you to truly fulfil your role as a business process manager. Asset Agent helps you to gain insights for better efficiencies, eliminate waste and boost productivity to improve the way you manage your car deliveries. Overall, your reputation as a knowledgeable manager will grow and positively impact your other projects.

“With Asset Agent, we have the necessary, maximum availability, but also the tool to carry out these complex and critical processes of vehicle preparation, always in terms of the best customer experience. Without Asset Agent, nothing works here.”

– Michael Imrock, Manager Process and Vehicle Control, Department Vehicle Preparation, VW Wolfsburg
