

September 7th, 2015 - On behalf of the Johan Sverdrup partnership, Statoil awarded IDENTEC SOLUTIONS the contract for the RFID Personal Registration and Access Control System to be deployed and supported on the giant Johan Sverdrup field development. "The Johan Sverdrup field is one of Norway's largest offshore oil discoveries and of strategic importance to IDENTEC SOLUTIONS as we continue to invest in the safety of personnel offshore," said James Douglas Pentreath, Global VP Sales Oil & Gas.

The Frame Agreement contains the design, manufacturing and deployment of a complete active RFID Automated Mustering Solution onboard the Johan Sverdrup platforms for all phases of the field development in regards to the mustering system and other related systems that are included in the contract. The Frame Agreement also includes future field developments on both the Norwegian sector and international developments that Statoil Operate and stretches over a 5 year period with an extension, making this a long term partnership for IDENTEC SOLUTIONS and Statoil ASA.

IDENTEC SOLUTIONS has been partnering with Statoil since 2009 on various technology initiatives including the tracking of material onshore and offshore, the recent award signifies Statoil's commitment to adopting robust and reliable technology that exceeds the technical and safety standards set for offshore operations in harsh environments by the Norwegian Oil and Gas industry.

About IDENTEC SOLUTIONS

IDENTEC SOLUTIONS delivers innovative wireless sensor technology and systems that help transform the way businesses manage industrial processes and safeguards lives. Committed to developing industry-leading, low power and long-range sensor based solutions, IDENTEC SOLUTIONS SensorSMART networks have been setting the industry standard since 1999. Currently deployed on every continent throughout the globe in the Oil & Gas, Ports & Terminals, Tunnel & Mining, Automotive, and Chemical industries. IDENTEC SOLUTIONS patented technology is helping to optimize productivity in some of the continent's most challenging situations. Robust, flexible and powerful IDENTEC SOLUTIONS technology delivers when others cannot. Privately held, IDENTEC SOLUTIONS corporate office is located in Lustenau, Austria, and North American headquarters in Dallas, Texas, along with service centers in Germany, Australia and Norway.
