Time and attendance solution for 4,000 workers for the Oil & Gas industry provides instant payback

Consolidated Contracting Company (CCC), the largest construction company in the Middle East, have installed a time and attendance solution from IDENTEC SOLUTIONS to help manage the 4,000 workers working at a gas production plant they are constructing for PDO OMAN. The system is based around IDENTEC SOLUTIONS robust and reliable active RFID technology.

Every one of the 4,000 workers on the 1.5 million square meter gas production plant is outfitted with an ATEX approved active RFID tag made by IDENTEC SOLUTIONS. Wireless portals are installed at all entrance gates tracking the movement of every worker on a 24/7 basis. This enables the simultaneous registration of large amounts of CCC's own staff, as well as subcontracted personnel, irrespective of whether they arrive at the site in buses, cars or on foot. Personnel do not need to exit vehicles to be registered, and vehicles don't need to stop during the registration process.

The site has over 4,000 personnel who previously on a daily basis had to exit their vehicles and proceed on foot through manual gates. The new solution provided by IDENTEC SOLUTIONS saves CCC approximately 4 hours each day in registering persons on and off the site, which results in savings of over 210,000 man-hours per year.

CCC are now in the process of expanding the solution with more wireless portals to enable them to calculate who is where within the site, at what time, and for how long. As CCC utilizes a large number of subcontracted personnel this is beneficial for matching completed timesheets submitted for payment against their own logs of who attended on what day in real time.

About IDENTEC SOLUTIONS

IDENTEC SOLUTIONS is a global provider of wireless solutions that provide visibility, improve efficiency, safety as well as security in industrial operating environments. Our industry-specific solutions are built on robust wireless technology, that is used by the world's leading blue-chip companies in the Oil & Gas, Ports & Terminals, Automotive, and Mining & Tunnelling industries as well as other harsh environments. Leveraging years of expertise, our highly experienced and innovative teams, serve customers worldwide from our offices in Austria, Norway, Germany, USA and Australia. This global footprint allows us to provide state-of-the-art solutions, short response times and to closely support client operations worldwide.

ABOUT:

IDEN TEC SOLUTIONS

IDEN TEC SOLUTIONS AG is a global provider of wireless solutions that improve efficiency, safety and security in harsh operating environments including oil and gas, tunnels and mining, and ports and terminals.

We help container ports and terminals to automate reefer, yard, gate and quay crane processes, delivering proven benefits such as reduced dwell times, faster horizontal-to-vertical move hand-offs and no lost or unplugged containers. By leveraging our industry leading real-time locating sensor technology we monitor and control the full container flow, allowing operators to enforce the plan, locate every container and see actual performance from drivers, cranes and the overall terminal

An IDEN TEC GROUP company, IDEN TEC SOLUTIONS is privately held with its corporate office in Austria, and regional offices in Australia, Germany, Norway and USA.
