

WATCHERINDUSTRY RTLS

Real time location of your vehicles and goods throughout the whole production process.

Visibility Delivered.

IDEN TEC SOLUTIONS provides innovative wireless location solutions to increase safety, productivity and efficiency in harsh industrial environments.

We are experts in the development of industrial wireless solutions. These serve to identify and locate people and goods in industrial environments. With our industry-leading solutions, we set standards – and have done so since 1999.

Our patented technology helps companies optimise their processes, even under the most demanding conditions. Our reputable client base includes Volkswagen AG, AUDI AG, Daimler AG, BMW Group, Continental AG, and many others.

Robust, flexible, powerful – we deliver where others reach their limits.

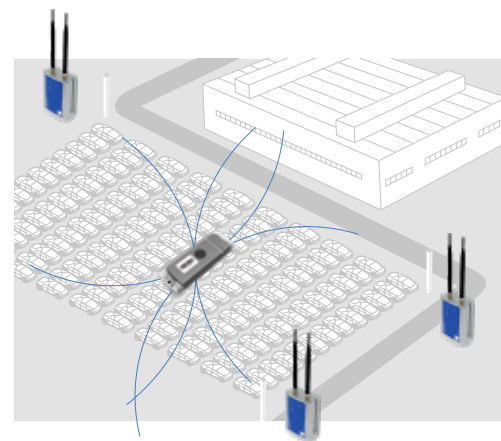

IDEN TEC SOLUTIONS, with headquarters in Austria, has other subsidiaries in Australia, Germany, Norway and the USA. For more information, please visit our website: www.identecsolutions.com

WATCHERINDUSTRY RTLS by IDEN TEC SOLUTIONS is a system based on radio technology for accurate identification and real time location of vehicles and materials in the production process. Through automation, the productivity and efficiency of all processes from production to delivery can be improved considerably.

With WATCHERINDUSTRY RTLS (Real Time Locating System), even unguided processes can be automated during production. The zone-specific location of products and materials during the entire work process allows for consistently efficient planning and monitoring of the processes. This monitoring allows for prompt intervention. Consequently, error sources can be minimised and safety can be increased.

Benefits at a glance:

- Increase in production efficiency
- Automation of operational processes
- Optimisation of material usage
- Minimisation of error sources
- Increase in operational safety

“The RTLS solution by IDEN TEC SOLUTIONS provides us with reliable real-time data on the exact location of up to 10,000 vehicles. This is of critical importance for planning, monitoring and documenting the delivery processes. Digital location of individual vehicles greatly reduces search times and significantly simplifies work for the staff. We really no longer can imagine the work process without WATCHERINDUSTRY RTLS” // Gerald Gosemann, Head of IT-Systems, Volkswagen AG
